Re: First Request for Information Pursuant to § 104 of CERCLA for the Vasquez  
Boulevard/I-70 Site, Denver, Colorado

Dear Ms. Tesorero:

On behalf of Pepsi Bottling Group ("PBG"), the attached is intended to supplement PBG's earlier responses to the above-referenced information request. On September 11, 2001, I forwarded on behalf of PBG a description of work at the PBG facility. This description outlines seven work areas. On September 11, 2001, I forwarded soil sampling results for Areas 1 and 2. On October 1, 2001, I forwarded soil sampling results for Area 4. On November 5, 2001, I forwarded soil sampling results for Areas 3 and 6 and certain utility trenches.

Responsive to questions 6(d) and 9(h) of the original information request, enclosed herewith are soil sampling results for Area 7 and a Geotechnical Investigation of the soils underlying the area of the proposed storm water detention pond to be constructed in Area 7. As is recommended in the geotechnical investigation, in order to mitigate the possibility of infiltration of surface water through the subsurface PBG intends to install an HDPE Liner during construction of the pond.
